

One workspace for your organisation's AI governance work.

Bring your AI policy, register, preparation, assessments and decisions together. Keep evidence, responsibilities and follow-up connected as your organisation's AI use develops.

For the people responsible for AI oversight.

Built for governance and risk leads in mid-sized Australian organisations, working with business owners, operations leaders and technology teams.

What your team can do

01

Maintain your AI policy

Keep the owner, status, version and review point together.

02

Keep a shared AI Register

Record AI systems, use cases and the people responsible.

03

Prepare an AI proposal

Examine process, people, data, suppliers and evidence gaps.

04

Assess the use case

Review Business, People, Technology, Risks and the combined report.

05

Record the decision

Preserve its basis, boundaries, conditions and accountable owner.

06

Maintain oversight

Keep actions and review points connected to the use case.

A connected path from proposal to review.

Start with the task you need. You do not need to begin with an assessment.

01

Establish

Create your policy and shared AI records.

02

Prepare

Understand the proposal, process, people, data and suppliers.

03

Assess

Review findings, supporting evidence and unanswered questions.

04

Decide and review

Record the accountable decision, conditions, actions and review points.

See the work, not a promise

The screenshot displays the 'AI GOVERNANCE' workspace interface. The top navigation bar includes a menu icon, the 'ZH AI GOVERNANCE' logo, and a 'Signed in' status. The left sidebar lists various sections: ORGANISATION WORKSPACE, Workspace, Overview (highlighted), Use cases, AI Register, Governance, Policies, Tools and activities, Guidance and coverage, Decisions and actions, Reviews, Organisation, Members and access, Organisation settings, Export organisation records, Help, Worked examples, and Contact us. The main content area shows a 'RECORDED DECISION' titled 'Proceed to a limited test with agreed data, people and stop rules'. Below the title, a 'Worked example' section provides sample information. A table lists decision details: 'Confirmed' on '30 Sept 2026', 'Use-case version' '1', 'Next review' 'Preparation is complete', and 'Assessment basis' '0 included version(s)'. A 'Limitations' section lists two points: 'No customer evidence file was uploaded or assessed' and 'This is pre-authored sample information and does not establish production readiness'. A 'Conditions' section is partially visible at the bottom.

LIMITED TEST	
Confirmed	30 Sept 2026
Use-case version	1
Next review	Preparation is complete
Assessment basis	0 included version(s)

Limitations

- No customer evidence file was uploaded or assessed
- This is pre-authored sample information and does not establish production readiness

Conditions

Confirm the data boundaries — open

An accountable decision

The public learning library follows accounting and recruitment use cases through preparation, assessment findings, decisions and follow-up.

The image shows a read-only worked example. It illustrates product workflow, not a customer outcome.

Assessment outputs support human decisions.

They do not approve an AI use case or certify compliance. Keep findings, uncertainty and evidence gaps available for human review.

Australian guidance. A practical way to begin.

Use National AI Centre resources through guided activities and connected organisation records. No prior familiarity is needed.

zedhaque is not approved, endorsed or certified by the Australian Government. Your organisation remains responsible for its decisions and implementation.

Start free. Discuss more when you need it.

Each organisation receives full workspace access with one complete AI assessment included. The assessment allowance is shared across the organisation's members. Existing workspace records and results remain accessible afterwards.

For additional assessments, submit a request through Contact Sales inside the app. Additional trial allowance may be granted. Subscription options and expert support pricing are being explored.
